

CORPORATE OVERVIEW

Coforge

Where AI Engineering meets Industry Expertise

At Coforge, we believe that the leaders of tomorrow will have their business capabilities defined and executed by a combination of humans and agents, underpinned by an enterprise data core and a cloud foundation purpose-built for AI.

We are a global AI-native engineering services leader, where AI is the very foundation of how we design, build and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units.

With a deep focus on trusted AI, our solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI experimentation, we deliver measurable business outcomes - lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth.

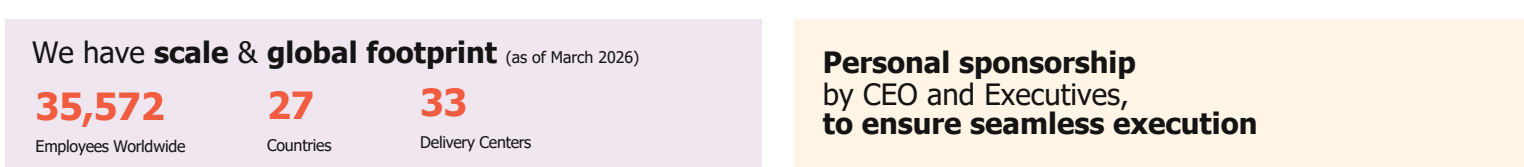

We are somewhat **atypical in our approach** to solving business problems. We are **specialists**, not just engineers and technologists, who spend an inordinate amount of time understanding the targeted functional spaces that we focus on.

Sudhir Singh,
CEO, Coforge

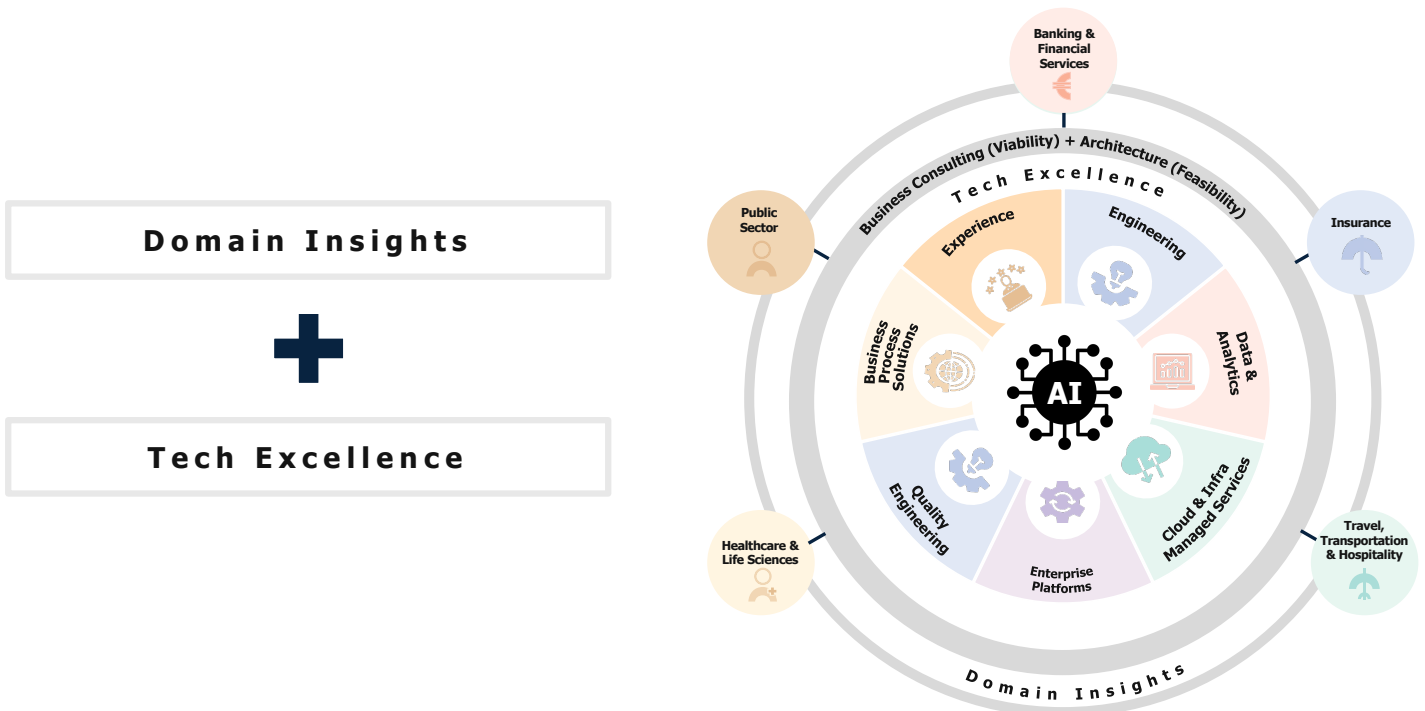

At the forefront of growth in IT services, Coforge continues to excel

Enterprise scale and executive sponsorship driving seamless delivery

Driving impact through the fusion of 'Domain insights' and 'Tech excellence'.

At Coforge, AI goes beyond being just a tech trend. It's a transformative force reshaping the way businesses' function, expand, and thrive

Build the 'Intelligent Businesses of Tomorrow'
